

Nanyang Technological University
IS6751 Text and Web Mining
Lab: Surname and News Title Classification with CNNs

In this lab, you will learn how to build classifiers with the CNN model.

1. Running the Jupyter Notebook

1.1. Copy the **notebook files** downloaded from the class website to
C:\Users\youraccountname\documents\python\IS6751

1.2 Open a Jupyter Notebook: [Data Preparation](#)

- File – Open ..., **munging-surname-dataset-v2.ipynb** in
C:\Users\youraccountname\documents\python\IS6751\wk9-lab\4_4_cnn_surnames
- Run the notebook document step-by-step (one cell a time)

1.3 Open a Jupyter Notebook: [Build a CNN Model for surname classification](#)

- File – Open ..., **4_4_Classifying_Surnames_with_a_CNN-v2.ipynb** in
C:\Users\youraccountname\documents\python\IS6751\wk9-lab\4_4_cnn_surnames
- Run the notebook document step-by-step (one cell a time)

1.4 Open a Jupyter Notebook: [Data Preparation](#)

- File – Open ..., **5_3_Munging_AG_News -v2.ipynb** in
C:\Users\youraccountname\documents\python\IS6751\wk9-lab\5_3_doc_classification
- Run the notebook document step-by-step (one cell a time)

1.5 Open a Jupyter Notebook: [Build a CNN Model for News Title classification](#)

- File – Open ..., **5_3_Document_Classification_with_CNN-v2.ipynb** in
C:\Users\youraccountname\documents\python\IS6751\wk9-lab\5_3_doc_classification
- Run the notebook document step-by-step (one cell a time)
