

Nanyang Technological University
IS6751 Text and Web Mining
Lab: Neural Machine Translation

In this lab, you will learn how to build neural machine translation models.

1. Update Python Packages

1.1. Start | Anaconda3 | [Anaconda Prompt](#)

1.2. Type the following command to upgrade nltk.

```
>>> pip install --upgrade nltk
```

2. Running the Jupyter Notebook

2.1. Copy the **notebook files** downloaded from the class website to
C:\Users\youraccountname\documents\python\IS6751

2.2 Open a Jupyter Notebook: [Data Preparation](#)

- File – Open ..., **8_5_nmt_munging.ipynb** in **C:\Users\youraccountname\documents\python\IS6751\wk10-lab\8_5_NMT**
- Run the notebook document step-by-step (one cell a time)

2.3 Open a Jupyter Notebook: [Build a Neural Machine Translation Model \(with no sampling\): English to French](#)

- File – Open ..., **8_5_NMT_No_Sampling-v2.ipynb** in **C:\Users\youraccountname\documents\python\IS6751\wk10-lab\8_5_NMT**
- Run the notebook document step-by-step (one cell a time)

2.4 Open a Jupyter Notebook: [Build a Neural Machine Translation Model \(with scheduled sampling\): English to French](#)

- File – Open ..., **8_5_NMT_scheduled_sampling-v2.ipynb** in **C:\Users\youraccountname\documents\python\IS6751\wk10-lab\8_5_NMT**
- Run the notebook document step-by-step (one cell a time)
